*Dear Angus Friends,*

*The Annual Midwest Connection Sale has historically been a showcase of the smaller, exclusive Angus operations that dot the countryside in Iowa and beyond. This year's offering follows that noble tradition and is maybe even more impressive. I had the opportunity to travel over many miles to select and photograph many in this offering and believe me, these represent the very top picks from their respective breeding programs.*

*The cornerstone of the 2020 Midwest Connection Sale is the Sweeney Farms Complete Herd Dispersion. Dave and Annette have been a part of the Angus fraternity for nearly 30 years. In their tenure as Angus entrepreneurs they have utilized a stringent performance regiment, artificial insemination of top sires and DNA technologies to keep this herd on*

*the cusp of the beef industry. Only in a dispersion can you choose from the very foundation of a program of this caliber. Two major herd reductions from veteran breeders Phil Archer and Brice Conover will be highlights with young cows bred to leading sires. In total, nearly 40 head of females are mated to SS Enforcer E812, the most celebrated son of SydGen Enhance and they await your appraisal.*

*The sale offering is further supported by an elaborate presentation of bred heifers, yearling replacement heifers, spring and fall calving cows and pairs, as well as herd sire prospects, breeding age bulls and a fancy set of show heifer prospects from leading Iowa, Missouri and Wisconsin programs.*

*Conover Auction Service welcomes your pre-sale inquiries and look forward to greeting each of you on December 6th, 2020 in Bloomfield.*

- Enforcer™ led off America's oldest Angus herd's 2019 sale, Sunnyslope Angus, making his dynamic public debut. The featured son of SydGen Enhance was the \$45,000 selection of Baldrige Bros, NE; Al & Jeanne Conover, IA; and Spruce Mountain Ranch, CO.
- He posted individual performance of BWR of 81, WWR of 106 and YWR of 115.
- His Pathfinder dam boasts progeny ratios of BWR 4@90, NR 4@105, YWR 4@103, IMF ratio 4@102 and RE ratio 4@112.
- Thirteen generations of Sunnyslope performance breeding is represented on the maternal side of his pedigree with five of seven most recent generations being Pathfinder dams.
- "Enforcer" has quickly established himself as the "go to" son of SydGen Enhance for astounding EPDs and exquisite phenotype.
- With his first 83 birth weights reported, Enforcer's BW EPD has fallen a full point from +.5 to a -.5 with accuracy climbing to 74%.
- As of this writing, progeny of "Enforcer" make up the #2 and #3 highest \$C value non-parent bulls in the breed at +390 and +389, as well as the #3 highest \$C value non-parent cow with a +382. Only one other sire in the breed can match his combination of CED, BW and \$C.

- Production: NR 1@105.
- Dam's Production: BR 6@97, NR 7@99, YR 1@100. IMF 3@107, REA 3@103.
- 505 is as good phenotypically as any cow in the offering. Her mother was out of the top selling bred female from Carlson's in ND that started the BTC herd.
- Her sire, TR Mr Aberdeen 1068Y is a phenotypically awesome ORigen featured sire that surfaced as the \$15,000 high-selling bull of the 2012 Thomas Ranch Bull Sale. Aberdeen 1068Y is a Brice Conover and Island Cattle Co herd sire that has left tremendous daughters in both programs. He is a calving ease sire that defies the antagonisms combining modest birth weights with performance, muscle and scrotal size.
- Her service sire, High Point Epic 819 was Brice Conover's selection from the 2019 High Point Angus Sale. Today he records astounding EPD values of CED +15, BW -3.3, WW +73 and YW +129, all in the top 10% or better among current sires.

Dollar value indexes, or **\$Values**, are a tool used to select for several traits at once based on a specific breeding objective. An economic index approach takes into account genetic and economic values as well as the relationships between traits to select for profit.

# American Angus Association \$Value Indexes

**Maternal Weaned Calf Value (\$M)**, an index expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. \$M is built off of a self-replacing herd model where commercial cattlemen replace 25% of their breeding females in the first generation and 20% in subsequent generations. Remaining cull females and all male progeny are sold as feeder calves. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

**Weaned Calf Value (\$W)**, an index expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. \$W assumes that producers retain 20% of their female progeny for replacements and sell the rest of their cull female and male progeny as feeder calves. Over time, increased selection pressure on \$W will increase pre-weaning growth through additional weaning weight and maternal milk with expenses adjustment for mature size and maternal milk.

**Feedlot Value (\$F)**, an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

**Grid Value (\$G)**, an index expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

**Beef Value (\$B)**, an index expressed in dollars per carcass, facilitates simultaneous multi-trait genetic selection for feedlot and carcass merit. \$B represents the expected average differences in the progeny post-weaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a quality-based carcass grid.

**Combined Value (\$C)**, an index expressed in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid.

- Service sire of bred heifers selling from Houks Angus.
- Owned jointly with Bear Creek Valley Angus, Blakesburg IA.
- This exciting young herd sire emerged as an embryo purchased through a former Hawkeye Country Sale bred by Tri - K Cattle Company, Waverly IA.
- His sire, Bruns Blaster, topped the 2015 Bruns Angus Sale in South Dakota at \$65,000 to Musgrave Angus and is now featured in the Genex line-up. He is a boldly sprung, stout featured bull with an EPD profile that ranks him in the top 5% or better for YW, Doc, Milk, \$W and \$F.
- The donor dam is one of the EPD champions in the Tri-K embryo program.
- Maternal grandsire, Plattemere Weigh Up K360 is the top YW EPD bull in the Select Sires line-up. His Pathfinder dam, Barbara of Plattemere 337, by Retail Product is now an elite donor at Deer Valley selling ½ interest to Simons Cattle Co at \$20,000 where she produced the donor dam of the \$27,000 top-selling heifer at the 2016 National Western Foundation Female Sale.

SAV Resource 1441 was the \$110,000 4th top-selling bull of the 2012 SAV Sale and quickly became one of the most heavily used young sires in the breed. His growth and muscle attributes are well understood in the breed but not to be overlooked is the high ranking foot scores and a PAP EPD in the top 1%. This year 50 Pathfinder daughters helped Resource again reach Pathfinder status.

- A power cow here! We had to twist Kyle's arm to release this foundation cow.
- Her first-born son by "Broken Bow" posted a WWR 113, YWR 115, IMF ratio 160, RE ratio 115 and sold in 2017 to David Rasmussen, Jefferson IA at \$6000.
- Her 2019 daughter by Woodhill Blueprint is retained and is a phenomenal heifer.
- She is a maternal sister to the dam of KM Blue Lady 4214, one of the most influential females ever in the KM program.
- She ranks 5% or better for WW, YW, RADG, HP, Doc, CW, \$F,\$B and \$C.
- The sire of her bull calf at side, KM Comrade 8240 has done a super job in the program. He combines EPD excellence, visual integrity and given the set of calves he produced, should be in an AI stud.

- Dam's Production: YR 3@95. REA 3@104, Rib Fat 3@90, Rump Fat 3@72. Calving Interval: 4@355 days.
- Her dam earned a spot in the breeding program and the donor pen with individual performance of WWR 115, YWR 109, IMF 106 and RE 106.
- She stems from an outstanding cow family that originated in the Bill Rishel herd in NE. Many bulls from this cow family have been top sellers in the annual KM Bull Sale.
- Her grandam is a second-generation Pathfinder dam that records NR 6@111, YR 6@109 and a calving interval of 7@358 days.
- Her sire, Baldrige Colonel C251 is a maternal brother to the "great eight" bulls that headlined the 2016 Baldrige Sale including Select Sires' \$157,000 Baldrige Bronc and Hoover Angus' \$100,000 Baldrige 38 Special. Colonel is a moderate BW bull with tremendous growth and carcass EPDs. The Angus fraternity is abuzz about this son of Baldrige Isabel Y69 that topped the 2017 Baldrige Sale at \$580,000.
- Excellent potential in her Broken Bow heifer at side and she is mated back the same way.

- A true feature here. She is an outstanding Tehama Bonanza daughter that excels for both CE and \$M. She is very strong in growth traits as well.
- No other Bonanza daughter in the breed can match her combination of CED and \$M value.
- Her grandam is a Pathfinder dam and one of the best Broken Bow daughters in the herd. She has been a major donor dam in the KM Cattle program. She recently produced a flush of "No Doubt" calves that will be featured in the spring KM Bull Sale.
- Service sire, Diablo Deluxe 1104 was the top performing bull in the 2017 Cal Poly Bull Test. His first progeny included a \$140,000 top-seller at Crazy K and an \$80,000 seller at Spruce Mountain.

- Certain to be a headliner, this "Acclaim" daughter combines growth, carcass attributes and the acclaimed KM Queen May cow family. Her outstanding EPD and \$values are backed by Angus GS results with seven traits in single digits.
- Her dam is a maternal sister to KM Roughage Buster 93 that KM Cattle Company sold to ABS Global. Unfortunately, he suffered a career ending injury early upon his arrival at ABS.
- Her service sire, KM Broken Bow 002 led ABS in semen sales in the 2017 breeding season and has rapidly become one of the most popular bulls in the breed. His sons have consistently topped sales where he has been used including the recent \$190,000 Casino Bomber in CA to Vermillion Angus Ranch the \$50,000 Sitz Broken Bow 11076 to Genex and Hilltop Angus, the \$60,000 valued SydGen Blueprint to Justin Spickler and the increasingly popular Spring Cove Reno 4021 at ST Genetics.

- His 2018 maternal brother was a herd sire selection of Brent and Amy Soenderk, Wellington MO.
- This set of flush brothers are produced by one of the most powerful cows in the herd. 405 also produced their flush sister M Bar M Blackcap 907 purchased by Landon Kennedy. Landon and "Kate" have had a very successful show career so far and it's not over yet. The 405 – Primo mating gave us the phenotype we were wanting for heifers and stout bulls with eye appeal.
- His flush brothers sell as Lots 126 & 127.
