SCVBT

Performance Tested Beef Bull Sale

Saturday - April 20, 2019 - 12:00 p.m.

Sale Preview: 10:00 a.m.

University of Wisconsin

River Falls, WI

Celebrating 36 Years of Performance Tested Herd Sires

Red Angus

Simmental

Black Angus

South Devon

Dear Cattle Producer,

Welcome to the 2019 St. Croix Valley Bull Test . We are proud to offer you an outstanding group of performance tested Black Angus, Red Angus, Simmental and South Devon herd bulls. The bulls in this test represent the “best of the best” from top herds across Wisconsin.

All bulls have been ration tested, ultrasounded and fertility checked to provide you the information you need.

The bulls have been fed a high forage diet that allows them to express their true genetic potential. A diet of this type, combined with a good health program and genetically superior cattle assures that a bull purchased from the St. Croix Valley Bull Test will add value to your herd.

We look forward to serving your genetic needs now and in the future.

Thank You for your interest in our bull test.

Sincerely,

St. Croix Valley Bull Test Consignors

Terms of Sale

Terms of this sale are cash or check. Each bull will be sold to the highest bidder. The auctioneer will settle any disputes as to bids. The buyer must pay for bulls before being released. **Bulls cannot be loaded until after the sale.** Each bull will be at the buyer's risk as soon as they are sold, but will be cared for by management for a reasonable time until they are loaded. SCVBT and UW-River Falls assumes no liability for injury, sickness or death during transport after the sale or any other time there after. The Sale of each bull constitutes a contract between seller and buyer and expressly excludes SCVBT and UW-River Falls from liability, contractual or otherwise to the seller or buyer.

Registration:

Certificates will be transferred to the buyer at the seller's expense.

SCVBT Guarantee:

All bulls are guaranteed breeders by the seller if properly managed. Only the bulls that have been examined for breeding soundness and classified as satisfactory potential breeders by a staff veterinarian are eligible for sale. Any bull appearing structurally or reproductively unsound in the opinion of the staff veterinarian and the bull test board of directors will not be sold.

SCVBT and UW-River Falls assumes no liability for any bull sold that subsequently fails to have breeding capabilities. The sale constitutes a contract and agreement between buyer and seller. The seller assumes no liability for injury, sickness, or death of the bull(s) during transport after the sale or anytime thereafter. In the event a bull is a non-breeder because of factors other than injury, sickness, or death, the seller must be notified in writing within 6 months of the sale day of that fact. A vet certificate and prognosis must accompany that written notification. A copy of the buyer's letter and vet's certification and prognosis must be sent to the SCVBT Chairman. A yearling bull is considered a breeder if he is at least 15 months old at the time of use, and is exposed to no more than 15 cows, and settles at least ½ of those females within a 60-75 day period. The guarantee is void if the bull has lost weight from the time of sale to the time of the complaint. Non-breeder options are as follows:

- A. Seller has 6 months from the time of written notice receipt to prove the bull is a breeder. If the bull is proven as a breeder by the seller's vet he can return the bull to the buyer. Trucking will be at buyer's expense.
- B. Seller may replace the purchased bull with one of comparable quality and performance. Acceptance by the buyer is mandatory. Trucking is at the buyer's expense.
- C. Seller may refund full purchase price for the non-breeder if approved by the buyer. Trucking of the non-breeder is at the buyer's expense.
- D. If the bull is proven a non-breeder after the seller exercises option A, then option B or C can be exercised at the buyer's choice.

Options A,B,C,D, are considered full and satisfactory settlement. The buyer and seller may agree on other terms. All disputes about breeding are between the buyer and seller. SCVBT and UW-River Falls is not responsible for the settlement of these disputes.

Bulls in this sale are not declared John's Free.

Bids:

To place phone bids call: **Bill Schermer 641-425-2641**
Casey Jentz 608-234-1998

Announcements:

Announcements sale day take precedent over this catalog.

Obligations:

It shall be expressly understood that all persons who attend this sale do so at their own risk. SCVBT and the University of Wisconsin River Falls and its employees assume no liability, legal or otherwise, for accidents that might occur. The terms of this sale shall constitute a contract between buyer and seller only.

Explanation of Terms and Abbreviations

- I.D. #** Used to identify the bulls at the test station. Each consignor has a different first number & their bulls are in numerical order.
- DOB:** Date of birth.
- Birth Wt:** The actual birth weight as reported by the owner.
- Start Wt:** The weight of the bulls at the start of the test on Nov 16th
- Final Wt:** The final test station weight of the bull as of Mar 15th
- ADG:** Average daily gain of the bull on the 119-day test.
- ADG Ratio:** A % comparison of how that animal gained versus the breed average at the SCVBT. A ratio of 100% is average.
- WDA:** Weight per day of age. What the bull has gained on average each day since birth.
- WDA Ratio:** A % comparison of the individual to the breed on test at the SCVBT
- Sale Ratio:** A composite of how the bull performed at the SCVBT within his breed, 75% of ADG ratio, 25% of WDA ratio.
- Hip Height:** The height at the hip of the bull on March 20th
- Frame Score:** A score given based on hip height and age.
- Scrotal:** The measurement of circumference of the scrotum.
- EPD:** *Expected Progeny Difference*, is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus.
- CED/CE:** *Calving Ease Direct*, expressed as percentage of unassisted births, a **higher value indicates greater calving ease in first-calf heifers**. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.
- BW:** *Birth Weight*, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.
- WW:** *Weaning Weight*, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.
- YW:** *Yearling Weight*, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.
- CEM/MCE:** *Calving Ease Maternal*, is expressed as a difference in percentage of unassisted births with a **higher value indicating greater calving ease in first-calf daughters**. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.
- Milk:** *Maternal Milk*, is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.
- CW:** *Carcass Weight*, expressed in pounds, is a predictor of the differences in hot carcass wt of a sire's progeny compared to progeny of other sires.
- Marb:** *Marbling*, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.
- RE/REA:** *Ribeye Area*, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.
- Fat/BF:** *Fat Thickness*, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.
- \$W:** *Weaned Calf Value* - An index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk and mature cow size.
- \$F:** *Feedlot Value* - an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.
- \$G:** *Grid Value* - an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.
- \$B:** *Beef Value* - an index value expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning and carcass value compared to progeny of other sires.
- Stay:** *Stayability* - Predicts the probability that a bull's daughters will remain in the herd until at least 6 years of age.
- API:** *All-Purpose Index* - Evaluates sires for use on the entire cow herd with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.
- TI:** *Terminal Index* - evaluates sires for use on mature cows with all of the offspring put on feed and sold grade and yield

- % IMF:** Percentage of inter muscular fat as determined by ultrasound.
- Rib fat:** Ultrasound data of external fat thickness in inches at the 12th rib.
- REA, RE:** Ultrasound data of the rib eye area (loin) of a sire's progeny, measured in square inches.
- Rump Fat:** Ultrasound data of external fat thickness in inches taken on the rump between hooks & pin bones.

Why Buy Your Next Bull at St Croix Valley Bull Test?

- You can choose from a broad range of genetic diversity in a single location
- All bulls have passed a veterinarian Breeding Soundness Exam.
- Bulls are guaranteed to be free of all known Genetic Defects
- PI-BVD tested for Persistent Infection (PI) Bovine Viral Diarrhea (BVD)
- You get Accurate Performance Records that document rate of gain using a real-world high roughage diet which more closely resembles what *your* cattle are being fed.
- Ultrasound is performed to accurately measure carcass quality
- Weights and Measures have been submitted to each Breed Association, so EPD's are of the highest possible accuracy
- Your new bull comes with the SCVBT Guarantee (see "Terms of Sale" for details)
- Vaccinations - before entry into SCVBT, all bulls are required to undergo a vaccination regiment which includes BVD, IBR, PI3, Lepto, Clostridium, and many more.
- *The Best Of The Best* - Typically only bulls deemed the best-in-herd are entered into the Bull Test and only 70% of those bulls perform well enough to earn a place in the sale. So when you buy a bull at St Croix Valley Bull Test, you are buying The Best of The Best.

For videos of the bulls offered in this sale visit:

This is a good sound bull that had a high ADG all test. Wide Range son and a maternal grand dam that is a Triple C cow. A bull that you could run with heifers and cows with confidence. He is out of a first calf heifer that is correct with a good udder and milked like crazy. No creep fed.

Pine Hill Angus

When Calving Ease Matters - But Performance Still Counts

Gentle, Efficient, Hard Working Cattle.
"Come Back to What Matters"

Through the years we've made many changes to our operation, better crops, a new barn, more land, different machinery.

But our goals have always remained the same -

Thick-Made, Moderate Framed Cattle with Born-In Gentle Disposition and Above Average Performance.

Thanks for considering our cattle. We believe in what we do and are always honored when others see value in our efforts.

Visit www.pinehillangus.com for Pictures, Videos and more information on our Bulls and their Dams.

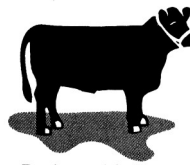

For Sale: Pine Hill Brittney 314B

We are offering for sale, 10 high quality females.

For a partial list, visit www.pinehillangus.com and click on Females For Sale. Check the website often as we will be adding more females For Sale as those decisions are made.

Call or text 715-781-1751 for appointment to stop by the farm and view the cattle. You're always welcome.
